

INTERNATIONAL DAY OF MASK BOYCOTT

DATE: FEBRUARY 14TH, 2022

PLACE: THE WORLD

In the aftermath of *The Freedom Convoy Event*, an *International Day of Mask Boycott* is organized. The simple goal is to destabilize governments by doing civil actions without breaking laws and especially without violence. By flooding all institutions with peaceful acts of resistance (that they will still call a crime), the goal is to paralyze the government and to show our resistance. After the *International Day Boycott* event, each person will be able to repeat peacefully this action every time she will go in a retail store.

The principles are simple but have to be formally respected to avoid any conflict:

- Go in a public retail store of your choice and enter with your mask;
- Inside, remove your mask and declare you are opposed to the sanitary tyranny:
 - They will ask you to put back your mask and will probably threaten to call the police;
 - Put back your mask and continue your shopping.
- After having paid your articles at the cash register, take off your mask and declare again that you are opposed to the sanitary tyranny;
- Get out calmly from the store and avoid any kind of provocation;
- Send a report by email, by social medias or any kind of communication to the organizer.

The action is simple, non-violent and can be repeated as often as you want without exposing you to a police intervention.
